Meet the Providers

Kevyn Comstock DO is Board Certified in Family Medicine and Neuromuscular Medicine/Osteopathic Manipulation. She completed her Family Practice Residency and Osteopathic Fellowship at Eastern Maine Medical Center.

Heather Evans DO attended medical school at the University of New England and is Board Certified in both Family Medicine and Neuromuscular Medicine/Osteopathic Manipulation. She has particular interest in nutrition and women’s health.

Bryan Lundquist MD received his medical degree at the University of South Carolina School of Medicine, serving his residency in Family Practice at Eastern Maine Medical Center. He is certified in Family practice.

Chadwick Sylivan MD received his MD, combined with a Master of Public Health, at Tufts University School of Medicine. He completed his residency in Family Practice at Eastern Maine Medical Center.

In an Emergency

We maintain emergency coverage 24 hours a day, seven days a week. You can reach the provider who is on-call by calling 907-3030.

Patient Rights and Responsibilities

As our patient, you have the right:

- To privacy
- To safe care
- To make decisions about your care, including refusing care
- To receive courteous and respectful treatment
- To know the services available, treatment options and risks involved
- To know the names of your caregivers
- To have information about the care you will receive, presented in terms you understand
- To get a second opinion or specialty consultation
- To have timely referrals to another care provider
- To have your pain treated
- To know when something goes wrong with your care
- To get an up-to-date list of all your current medications
- To receive an explanation of charges on your bill

As our patient, you have the responsibility:

- To be active in your health care
- To ask questions
- To share accurate and complete information as much as possible about your health history and condition, including care you may have received from another provider
- To understand the instructions given to you by your caregivers and to follow the instructions unless you disagree and discuss the implications with your provider
- To provide us with a living will, healthcare power of attorney or other written instructions about your future care

About Your Privacy

Your health information is protected by the HIPAA Privacy Rule, which provides federal protections for individually identifiable health information held by covered entities and their business associates and gives patients an array of rights with respect to that information. At the same time, the Privacy Rule is balanced so that it permits the disclosure of health information needed for patient care and other important purposes.

If you have any concerns or suggestions, contact our Quality Management office at 907-1884 or email info@sjhealth.com.

How to Find Us

We are located at 700 Mount Hope Avenue, within the Evergreen Woods Office Park.

When You Are in the Hospital

We are affiliated with St. Joseph Hospitalist Service/Sound Physicians, a group of specialist doctors called hospitalists, who care for patients while they are hospitalized. By using this service, your healthcare provider is more accessible to you for office visits. Meanwhile, if you should need to be hospitalized, you have constant access to a physician who specializes in the care of hospital patients and who remains in frequent contact with your provider at St. Joseph Family Medicine during your hospital stay.

About St. Joseph Family Medicine

St. Joseph Family Medicine – Evergreen Woods providers deliver a range of primary care services, including acute, chronic and preventive care that encompasses all ages. From infants to seniors, our primary care practice is here to provide high quality care with the compassion and excellence you’ve come to expect from St. Joseph Healthcare. At our practice we coordinate your care following evidence-based care guidelines which utilize the best research and clinical experience, consistent with each patient’s wishes and values.

Pediatric Care
Infants, toddlers, children and teens grow quickly and require frequent pediatric well-child visits to check growth and development and target problems early on.

Women’s Health Care
As a woman, certain routine care, special exams and screenings are recommended and available through St. Joseph Family Medicine, including pelvic exams, Pap tests and clinical breast exam. Your provider can also recommend other tests such as mammograms.

Men’s Health Care
Your provider can offer regular health exams and treatment for chronic conditions such as diabetes, as well as check for conditions that only affect men such as prostate cancer and low testosterone. With regular screenings, problems like colon cancer and heart disease can be prevented or diagnosed early.

Dermatology
Our healthcare professionals can evaluate and treat certain skin conditions, including rashes, moles, lesions and acne.

Osteopathic Manipulation
Osteopathic manipulative medicine (OMM) focuses on the whole person, including the relationship of the body’s nerves, muscles, bones and organs, as well as the body’s innate ability to heal itself. Osteopathic physicians apply the principles of OMM and use their hands to diagnose and treat illness, disease and injury. OMM can help people of all ages to ease pain, promote healing and increase mobility. Providers combine all available medical procedures, medications and treatments to offer the most comprehensive care available.

Nutritional Counseling
Healthy eating is one of the best ways to prevent certain diseases and conditions. Our staff is specially trained to counsel patients about what to eat based on their specific dietary needs.

Care Manager Program

Often, patients with chronic diseases struggle with managing their conditions and trying to improve their quality of life. Our Care Manager program offers additional services such as disease-management, self-care education and care coordination, at no additional cost!

- You will receive additional time and care from the RN above and beyond your routine office visits.
- You will have another healthcare contact to offer support and assistance in the management of your chronic condition.

Educational Support Available
Learn how to be a part of your care team! Courses in self-care management are available to all our patients through our Care Managers.
